

LETOURNEAU

A Keppel Company

BUILT on experience DRIVEN by vision

**LeTourneau Self-Elevating Vessels
1500 Series**

LeTourneau 1500 Series self-elevating vessel is designed to be a multiple-purpose workhorse for coastal activities. It combines the capabilities typically found in larger units while remaining cost-effective. Originally designed to operate in a variety of oilfield scenarios, the 1500 allows for great flexibility in its deployment in shallow water activities. Possible deployments include cargo transportation, hotel accommodation, windfarm service, civil construction, light drilling (such as coiled tubing), tendering, and other pursuits of a similar nature.

Design Criteria

ABS ✕A1, Self-Elevating Unit, AMS, DP-0 (Up to DP-2 available; DNV/BV available).

Principal Specifications

(Base Configuration: Model MP-1500R) *

Hull Length	61m
Hull Width	38m
Hull Depth	7m
Load Line Draft	4m
Leg Length	Up to 100m
Leg No. & Type	4 (Cylindrical or Truss)
Variable Deck Load	Up to 1500 Tonnes
Clear Deck Area	800m ²
Jacking System	LeTourneau or Keppel Offshore Technology Development (OTD)
Accommodation Capacity	100 persons
Design Speed	5-6 knots
Operating Water Depth	Up to 55m (60m for benign conditions)

Optional / Customizable Features

(Base Configuration: Model MP-1500R) *

Helideck	Bell 412, AW 139 (up to S92 available*)
Main Crane	200 Tonne leg encircling
Aux Crane	50 Tonne pedestal
